| Project Name  | Project – Personal Expense Tracker Application |
| Maximum Marks | 4 Marks  |

## **Data Flow Diagrams:**

The DFD helps represent the system. For Personal Expense Tracker, DFD shows that the system has one entity which is user. The processes include register, login, manage income, manage expense, and produce report.

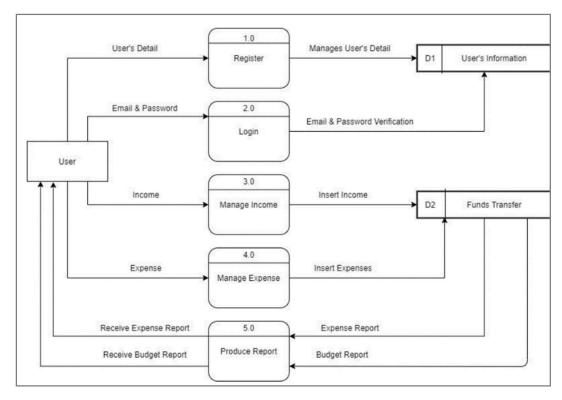

Figure.1 shows the DFD Level 0 (Industry Standard) for Personal Expense Tracker

## **User Stories:**

| User Type                                  | Functional<br>Requirement<br>(Epic) | User Story<br>Number | User Story / Task   | Acceptance criteria  | Priority | Release  |
|--|-------------------------------------|----------------------|---|--|----------|----------|
| Customer<br>(Mobile user)                  | Registration                        | USN-1                | As a user, I can register for the application by entering my email, password, and confirming my password.     | I can access my account / dashboard                                      | High     | Sprint-1 |
|  |                                     | USN-2                | As a user, I will receive confirmation email once I have registered for the application                       | I can receive confirmation email & click confirm                         | High     | Sprint-1 |
|  |                                     | USN-3                | As a user, I can register for the application through Facebook  | I can register & access the dashboard with Facebook Login                | Low      | Sprint-2 |
|  |                                     | USN-4                | As a user, I can register for the application through Gmail   | I can register & access the dashboard with Gmail Login                   | Medium   | Sprint-1 |
|  | Login                               | USN-5                | As a user, I can log into the application by entering email & password  | I can login into application if correct mail id and password are entered | High     | Sprint-1 |
|  | Dashboard                           | USN-6                | As a user, I can see my transaction history   | l can see if login is successful   | Medium   | Sprint-1 |
|  |                                     | USN-7                | As a user, I can check balance  | I can see if login is successful   | Medium   | Sprint-1 |
|  |                                     | USN-8                | As a user, I can update my salary and expenses  | I can see if login is successful   | High     | Sprint-2 |
| Customer Care<br>Executive (IBM<br>Watson) | Application                         | USN-9                | As a customer care executive, IBM Watson chat assistant can solve the problem and help the users facing issue | Chat assistant can provide support at any time                           | Medium   | Sprint-2 |
| Administrator                              | Application                         | USN-10               | As an administrator, I can update the application based on user reviews                                       | I can upgrade the application  | Medium   | Sprint-3 |
|  |                                     | USN-11               | As an administrator, I can fix the bugs   | I can fix bugs in case of issues   | Medium   | Sprint-3 |
